

DUROROOM

DuroRooms are designed to isolate and contain a hazard created during a manufacturing and maintenance process or protect a process from external contamination. All systems are custom designed to a customer's requirements including:

- H' x W' x L'
- Temperature and humidity.
- Lighting foot-candle/lumens.
- Filtration requirement.
- Positive, negative or neutral pressure.
- Fire suppression requirements.

APPLICATIONS

DuroRooms are used for dust control, coating, clean rooms, isolation rooms, anterooms or gowning rooms, and non-destructive testing environments.

QUICK STATS

4 STYLES AVAILABLE

- Retractable soft wall up to 50'H x 65'W
- Fixed soft wall
- Hard wall
- Custom

MODULAR

- Rapid commissioning; days vs weeks.
- Easily modified.

RETRACTABLE

- Retract to 20% of extended length.
- Simplify material handling with access to overhead crane.
- Maximize floor space.
- Up to 50'H x 65'W

MULTIPLE FRONT WALL DESIGN

- Barn doors (bi-fold, tri-fold quad-fold).
- Mesh curtain.
- Roll up door.
- Open face.

ENHANCE FACILITIES

- Retrofit older leased facilities with no changes to infrastructure.
- Simplify workflow.
- Multiply productivity in shared larger spaces by creating contained work cells.
